Large industrial and small home greenhouses are increasingly appearing. Setting up the facilities poses a number of challenges, such as proper air filtration, maintaining perfect temperature and humidity, and much more. To help you deal with these obstacles while growing your food, we have created

A Hydroponic System

Grow your plants in the most efficient way with our powerful hydroponic system.

1

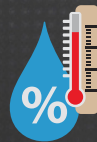

Temperature control

With AI Garden, you can track the greenhouse temperature from your mobile device.

Air Circulation Control

AI Garden the ability to filter and sterilise the incoming and outgoing air.

A+ Humidity Monitoring

You are receiving constant information about the humidity in your greenhouse.

2

CO₂ Monitoring

Monitor CO₂ levels in your greenhouse and achieve optimal results.

Soil Moisture Control

You are able to monitor the soil moisture, ensuring proper photosynthesis for the plants.

Proper Light for Optimal Growth

Make sure that your plants are getting the sunrise and sunset they deserve.
